# HYUNDAI DP086CBP

### DESCRIPTION

**FEATURES & BENEFITS** 

- G3 Class(ISO 8528-5)

[High Performance & Durability]

- HVO/GTL : Usable up to 100%

an altitude of 1,000 meters

1,000hrs without replenishment

- Operates without power derating up to

- Longer warranty period through strict

- Robust main structure parts

- Oil maintenance interval:

- HD Hyundai Infracore introduced new generator electronic engines DP086C- Series.
- When compared to other engines of equivalent capacity, it displays a higher output, better fuel efficiency, higher safety, and easier maintenance.
- Satisfying EPA/CARB Tier4F regulation, it is expected to become the key product of HD Hyundai Infracore.

### [Convenience & Safety]

- 50/60 Hz switchable -
- Maintenance free through auto tensioning belt drive system
- Cold Startability@-25℃ without supplementary device
- Radiator to cover a wide range of usage condition
- Safety guard for hazard parts
- Meet REACH & RoHS regulations

## OUTPUT

verification

|         | 1,500 RPM (50Hz) |     |       |     |            |     |         | 1,800 RPM (60Hz) |       |     |            |     |     |     |     |     |     |
|---------|------------------|-----|-------|-----|------------|-----|---------|------------------|-------|-----|------------|-----|-----|-----|-----|-----|-----|
| Standby |                  |     | Prime |     | Continuous |     | Standby |                  | Prime |     | Continuous |     |     |     |     |     |     |
| kWm     | kWe              | kVA | kWm   | kWe | kVA        | kWm | kWe     | kVA              | kWm   | kWe | kVA        | kWm | kWe | kVA | kWm | kWe | kVA |
| 225     | 205              | 256 | 205   | 186 | 233        | 144 | 129     | 161              | 260   | 234 | 293        | 236 | 211 | 264 | 165 | 145 | 181 |

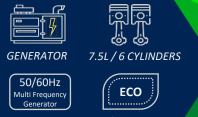

• Generator efficiency (typical) : 93.5%

• kWm= kilo Watt mechanical, Gross power; kWe= kilo Watt electric = (kWm-Fan loss) x Generator eff.; kVA= kilo Volt Ampere

Calculations based on a 0.8 power factor = kWe/0.8

• U.S. EPA TIER 3 Nonroad emission for Stationary Emergency Use Only. Prime/Continuous power rating for reference only.

### POWER RATING GUIDE

The power ratings of Emergency Standby and Prime are in accordance with ISO 8528. Fuel Stop power in accordance with ISO 3046. Electric power (kWe) must be considered cooling fan loss, alternator efficiency, altitude derating and ambient temperature.

**ESP(STANDBY POWER)** is applicable for supplying emergency power for the duration of the utility power outage. No overload capability is available for this rating. A standby rated engine should be sized for a maximum of an 70% average load factor and 200 hours of operation per year. This includes less than 25 hours per year at the Standby Power rating.

**PRP(PRIME POWER)** is available for an unlimited number of hours per year in variable load application. Variable load should not exceed a 70% average of the Prime Power rating during any operating period of 24 hours. The Total operating time at 100% Prime Power shall not exceed 500 hours per year. A 10% overload capability is available for a period of 1 hour within a 12 hours period of operation. Total operating time at the 10% overload power shall not exceed 25 hours per year.

**COP(CONTINUOUS POWER)** is defined as being the maximum power which the generating set is capable of delivering continuously whilst supplying a constant electrical load when operated for an unlimited number of hours per year under the agreed operating conditions with the maintenance intervals and procedures being carried out as prescribed by the manufacturer.

% Specifications are subject to change without prior notice.
