KUBOTA ENGINE

INPUT/OUTPUT FUEL PIPE

intercooler W/A assures the perfect functioning of the generator independently of the external ambient temperature, therefore the alternator and the engine will work at ideal temperature optimizing the performance and reliability of the gen-set. The generator may be installed in any room on the vessel without the need of ventilation blowers.

Extremely compact and quiet, the generator is equipped with a double shock absorbing system to increase comfort: the first one absorbs vibrations from engine-alternator to the frame, the second one absorbs residual micro-vibrations from frame to vessel.

CONTROL PANEL

_ The CBU module is equipped with a large display and includes multiple functions for the complete monitoring of the generator:

- Manual start
- Voltage Vac
- Frequency Hz
- · Engine rpm
- Hour meter
- Genset battery voltage
- · Oil low pressure alarm
- Engine high temperature alarm
- · Alternator high temperature alarm
- Alarm history
- Maintenance warnings and 10 meters connection cable
- _ Emergency stop button
- _ Thermal protection

ENGINE

_ Easy maintenance access to the feeding and lubrification systems, the sea water pump and the air filter

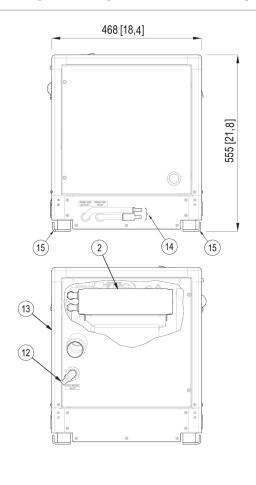

_ Double vibration dumping system

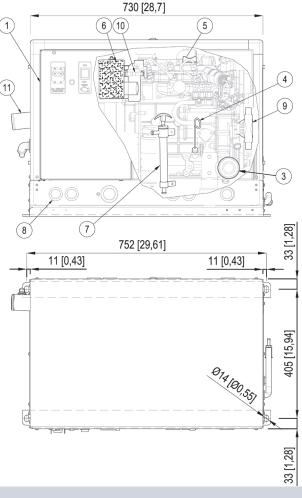

_ Oil drain pump

SOUNDPROOF CABIN

_ Made of extremely light marine aluminum with very high resistance to external agents

Insulated poles kit (for metal hull boats), dry exhaust kit and keel cooling kit are available on request
